

## **Hustings Questions – Treasurer**

Answers by Jules Graham

**You've all been on the HUS before, what do you think was your biggest accomplishment on the HUS?**

As one of the Ents officers I think realistically my biggest achievement was everything that happened in freshers week and all the planning and energy that went into 10 days' worth of activities. The thing

**How do you think you will be able to support the rest of the HUS team effectively?**

I am a very organised and supportive person. I feel that these traits will enable me to help manage and support other members on the HUS, from my experience the support team was key in enabling the exec members of the HUS through helping them when needed and giving a little moral boost now and then.

**What do you feel are some of the priorities for HUS spending?**

I think fundamentally the HUS spending needs to revolve around the students. With everything that's happened in the past year I feel the two spending priorities would be Welfare and Ents. Obviously, with the impact this year has had on student mental health making sure there are adequate welfare resources is a big priority, so money towards welfare events or resources would be a high priority. It's also been a long time since people were able to properly socialise and, if everything is open again, I would love to make sure students, and the Ents officers, have all the resources needed to take full advantage of that opportunity.

**Can you do anything about the VSG form? It's ridiculously intrusive to the extent that it made me not apply. Surely, they don't need to know outgoings for every single aspect of my life.**

I completely agree that a lot of the applications for funding from college can be unnecessarily intrusive and would be very keen to initiate conversations with college about this, specifically for the VSG but also for other aspects of funding (eg: year abroad funding).
