## For HUS Welfare Officer!

---

### My Priorities

**Make Welfare Fun For Everyone**  
I'll keep up popular Welfare events and bring new ideas like gardening outdoors or with take-home projects like potted plants, board games and computer gaming events, and more opportunities to make and hear live music. I'll also make sure snacks and drinks (alcoholic and non-alcoholic) are available at events, as well as creating more opportunities to give away club tickets, Homerton merch, and gift cards!

I'll also make sure HUS Welfare isn't just for people like me – I'll communicate actively with students to ask what events they would want to participate in, make sure events are happening on different weekdays and times to accommodate busy schedules, and work with BME and LGBT+ officers to make sure students of all different backgrounds have the opportunity to unwind and have fun.

**Make It Clear How I Can Help**  
I don't expect students to remember everything I've offered here—they should be able to find out what HUS Welfare can do for them anytime. I'll make Homerton mental and physical health resources clearer to incoming students and refresh current students through better email communication, online publicity, and care packages that display what's available.

### My Experience

I'm a first-year English student who has benefitted from HUS Welfare, and I want to be your Welfare officer because I have ideas to make it all the more helpful.

#### **HUS Access Co-Opt**

I've done my due diligence in the HUS, spending this year assisting the Target & Access Officer, so I have a good sense of how to get things done.

#### **Previous Student Services**

I was vice-president of my school's Student Council in Berlin, working with administration to get students the resources they needed especially in the wake of COVID.

---

#### **Private and Diverse**

#### **Health and Hygiene Resources**

The HUS office supply cabinet isn't cutting it, so I'll work to revamp HUS distribution of contraceptive, menstrual, and hygiene products, expanding the selection to ensure that we have all the supplies students could need. I'll also work to get supplies into bathrooms and accommodation blocks so everyone who wants condoms, tampons, face masks, or other essentials can access them at any time and without fear.

I'll also provide person-to-person aid, like ready-to-eat snacks and meals during busy weeks and judgement-free help cleaning or organizing.
